

# FIGURE

## *Action Line*

### GOAL

Learn what an action line is and practice using it to draw figures.

### TECHNIQUE

Action Line

### INSTRUCTION

An **action line** is the first mark made in figure drawing. You can think of the action line as an imaginary line that runs along the spine of the figure. The action line helps you to capture the figure's basic form and movement. The curvy your line, the more attitude and movement is evoked.

*Notice that an action line is a quick, simple, continuous mark.*

When drawing a figure, you may have two action lines to show the movement of the body and arms.

*Examples of one or two actions lines being used in a figure.*

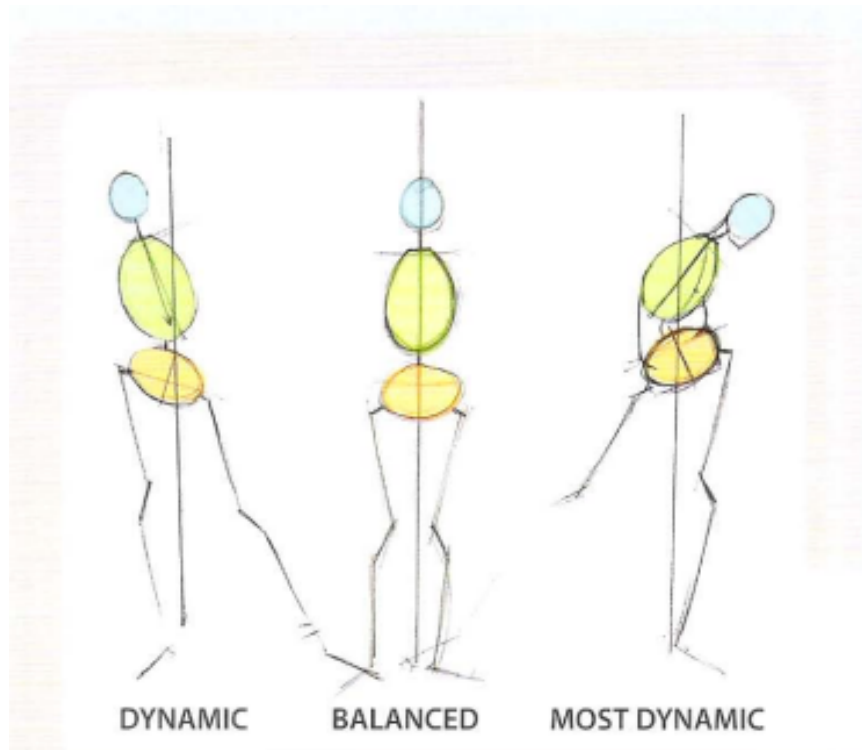

## EXAMPLES

*Examples of an action line in a figure.*

## PRACTICE

Practice drawing the action line in the following figures. Remember that an action line should be quick, simple marks.

## PRACTICE

Practice drawing the action line in the following figures. Remember that an action line should be quick, simple marks.

## PRACTICE

Practice drawing the action line in the following figures. Remember that an action line should be quick, simple marks.

## PRACTICE

Practice drawing the action line in the following figures. Remember that an action line should be quick, simple marks.

## PRACTICE

Practice drawing the action line in the following figures. Remember that an action line should be quick, simple marks.

---
